(+86)13631635573 | (+852)91967880 | xluocj@connect.ust.hk

Education

Aberdeen Institute of Data Science and Artificial Intelligence, South China Normal University (SCNU)
B.Eng. in Software Engineering; B.Sc. (Hons) in Computing Science, University of Aberdeen (UoA) | Sep 2022 – Jul 2026
The Hong Kong University of Science and Technology(HKUST), MSc in AI and Entrepreneurship | Sep 2026-Present
GPA (SCNU): 3.3/5.0 | IELTS: 7.0
Relevant Coursework: Python Programming, Web Development, Database Systems, Machine Learning Systems

EXPERIENCE & PROJECTS

Beijing Yanling Wangwei Intelligent Technology Co., Ltd. | Binary Fuzzing Agent Development Intern
2025.07—2025.09|Python, C, Prompt Engineering

- Contributed to an AFL-based fuzzing agent exploring LLM-assisted test-case generation, seed mutation, result analysis, and vulnerability reporting; researched relevant approaches to help shape the project's technical direction.
- Built Python crawlers to collect CVE identifiers, descriptions, and triggering scenarios, then classified the data to prepare a vulnerability corpus for LLM training.
- Refined vulnerability-analysis prompts to constrain the model's analysis scope and standardize its output.

Guangzhou Wanglv Internet Technology Co., Ltd.| Server Operations and Backend Development Intern
2024.10—2024.12 | Python, Linux, Nginx

- Helped streamline workflows for the company's telephone exchange system and maintained Nginx proxy configurations.
- Built a startup check that compared the server's machine identifier with its configured value and initialized critical programs when they differed; also synchronized bastion-host files and configurations to a standby server for recovery.

Smoore International Holdings Limited | Full-Stack Development Intern, R&D
2024.07—2024.08 | Vue 3, TypeScript, Spring Boot, MyBatis Plus, Spring Cloud

- Developed CPQ features using Spring Boot and MyBatis-Plus APIs and reusable Vue 3 components, including multi-currency conversion and quantity-based tiered pricing integrated into the quotation workflow.
- Built global key-value configuration and product cost/usage-rule management modules to centralize business parameters and rules.

Collaborative Course Notes and Materials Sharing Platform| Backend Developer, Team Project
2025.02—2025.05|FastAPI, MySQL

- Developed FastAPI APIs for user authentication and course management, using JWT for login tokens and Pydantic for request validation.
- Defined SQLAlchemy models and MySQL relationships for users, courses, and materials; implemented material upload and CRUD APIs with binary file storage and standardized responses.

Technical Skills

Programming Languages: Python, TypeScript, Java, C
Frontend: Vue 3
Backend and Automation: FastAPI, Spring Boot, MySQL, Linux, Nginx
