

Dear Students,

The **Course Project Guidelines** are now available. Please read the attached document carefully before beginning your project.

1. Team Formation

Please form a team of **5–6 students**. To join a team on Canvas, go to:

People → Groups → Teams for the final project

Self-sign-up is enabled. Please coordinate with your teammates and make sure that everyone has joined the same Canvas group.

2. Project Guidelines

Please follow the requirements for your selected topic in the attached guidelines, including the specified input/output, core functionality, expected outcomes, and evaluation criteria. The technical guidance is provided for reference, and you may design your own implementation workflow.

3. Proposal Submission Policy

Only **one proposal submission per team** is required. Please designate one team member to submit the proposal on behalf of the entire team by **October 17, 2026, at 11:59 PM**.

Extensions will **not normally be granted**. If exceptional circumstances prevent your team from meeting the deadline, you must contact the instructor and obtain approval **in advance**. Late submissions without prior approval may not be accepted.

Please refer to the attached **Course Project Guidelines** for full details.

Best regards, Course Teaching Team
